

Cryptography

Stego 4 (Medium)

This challenge evaluates the contestant's ability to use basic tools to find messages hidden with steganography. The [Digital Invisible Ink Toolkit](#) was used to hide a message using the HideSeek mode. The same tool can be used to reveal the hidden message. When the data is extracted from the image, another image is revealed:

This message can be decoded using a [Futurama Alphabet converter](#).

Question	Answer
