Open Source Intelligence

HTTP (Easy)

This challenge assessed the contestant's ability to understand HTTP headers. The answers to these questions can be found using the developer tool in any major web-browser or by using Google's search engine.

| Question | Answer |
|---|------------|
| What HTTP request header is used to denote what URI linked to the resource being requested? | referer |
| What HTTP request header is used to identify the client that made the HTTP request? | user-agent |
| What HTTP request header is used to identify the acceptable content types that can be returned? | accept |
