Cryptography

Stego 3 (Medium)

This challenge evaluates the contestant's ability to use basic tools to find messages hidden with steganography. The Digital Invisible Ink Toolkit was used to hide a message using the Battlesteg mode. The same tool can be used to reveal the hidden message. When the data is extracted from the image, another image is revealed:

This message can be decoded using an online hieroglyph translator.

Question	Answer
What is the md5 sum of the hidden file?	B2BDE37FEEDE452DB6CA45D1618785CA
What is the hidden message?	hidden messages
